

Berco[™]
THE HEART OF YOUR HOME

MATERIALS & FINISHES

The Surface.

The complete library
Berco · 2026 Edition

A finish is not a colour. It is how a surface behaves.

This is the complete library – 202 finishes, grouped by the material each one is actually made from, because that is what decides how it wears, where it belongs, and what it costs to put right if it is specified into the wrong room. Colours here are a guide. The physical sample is the decision.

Contents

01	How a door is built	04
02	Double-Faced Melamine	05
03	Vacuum-Formed & Pre-Finished Film	10
04	High-Gloss UV	14
05	Baked Lacquer	17
06	Powder Coating	20
07	Specialist Surfaces	21
08	Worktops	22
09	Carcase Panels	23
10	Choosing, and what to expect	24

Three layers, one decision.

Nearly every door in this book is the same three things: a core, a face, and an edge. The face is what you see and what this book shows. The core decides how the door carries weight and handles moisture. The edge is where cheap cabinetry gives itself away first.

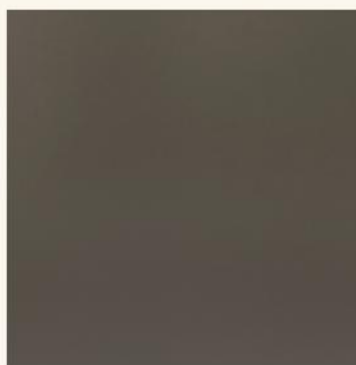

The core

11-layer plywood. Carries the load, holds the screw, and decides how the door copes with a wet room.

The face

Melamine, film, lacquer, UV, veneer, leather. What you see, touch and clean – and what this book is about.

The edge

Banded, wrapped or laser-bonded. The first thing to lift on a poor door, and the last on a good one.

DOUBLE-FACED MELAMINE

Double-Faced Melamine

A hard-wearing decorative surface pressed onto board. The everyday workhorse — scratch-resistant, colour-stable, and the broadest palette we carry.

Double-Faced Melamine

VACUUM-FORMED & PRE-FINISHED FILM

Vacuum-Formed & Pre-Finished Film

A film wrapped over a shaped MDF core. Seamless around profiles and edges, which makes it the choice for shaker and detailed door styles.

Vacuum-Formed & Pre-Finished Film

BAKED LACQUER

Baked Lacquer

Sprayed and oven-cured colour on an MDF core. The deepest, most even colour we offer, and the family to specify when the colour itself is the design.

Baked Lacquer

18 / 21 / 25 MM MDF CORE • MULTI-COAT SPRAYED LACQUER • MATT OR GLOSS

Milk White
kitchen

Coral White Gloss

Specialist Surfaces

PET FILM · WRAPPED PP · LEATHER · NATURAL VENEER

PET Film

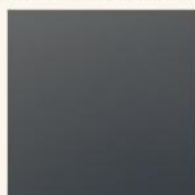

A tougher, lower-glare cousin of the standard film. Holds a satin sheen and resists fingerprints better than a true gloss.

Satin Grey
kitchen

Almond Grey
wardrobe

Knight Blue
wardrobe

Wrapped PP Film

A wrapped panel for profiled and moulded doors, where the covering has to follow a shape without breaking.

Black Pearl
wardrobe

Begonia Silk
wardrobe

Upholstered Leather

A tactile panel for wardrobe fronts and dressing rooms, where the door is as much furniture as joinery.

Vault Hide
wood door

Brocade Hide
wood door

Natural Wood Veneer

Real timber, sliced and laid. No two doors are identical, which is the point.

Red Cherry
wood door

Worktops

ENGINEERED QUARTZ · SINTERED STONE · NON-POROUS

Quartz Worktops

A dense engineered surface for worktops and splashbacks. Non-porous, so wine, oil and vinegar sit on it rather than soak in. Four of these are zero-silica.

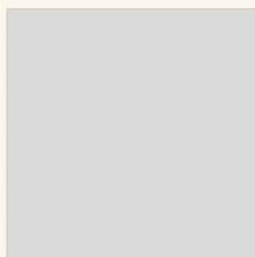

Iceland Grey

Wheat White

Maya Grey

Drifting Cloud

Cream

Hemlock White

Tianshan White

Jazz White

Auspicious White

Glaze White

Sintered Stone Worktops

Fired stone with a harder face than quartz and a higher tolerance for heat. The choice where a worktop takes a hot pan or a run of direct sun.

River Snow White

Pure White

Carcase Panels

11-LAYER PLYWOOD CARCASE · F4-STAR · FACED BOTH SIDES · ALUMINIUM KICKBOARD

The cabinet box itself. Specified separately from the door, so the interior can be matched to the front or deliberately contrasted with it.

Alabaster Grain
kitchen

Ash Grain
kitchen

Honey Oak
kitchen

Dove Grey
kitchen

Choosing.

See it in your own light

Every screen and every printed page shifts colour. Before anything is ordered we put the physical sample in your room, against your floor and your worktop, and look at it in daylight and at night. The sample is the decision, not this book.

Match the surface to the room

A wet room, a south-facing wall and a low-traffic dressing room are three different problems. We will tell you where a finish is the wrong choice, including when that means talking you out of the one you arrived wanting.

Availability changes

Ranges are added to and retired by the mill. We confirm that a finish is current and orderable at the point of quoting, and we will say so plainly if something you have chosen has been discontinued.

Would you like us to review your space
and guide you through the finishes?

Living with it.

Every day

A soft cloth and warm water. Wipe spills when they happen rather than later — most staining is a timing problem, not a material problem.

Never

Abrasive creams, scouring pads, bleach, or anything solvent-based. They dull a matt finish and micro-scratch a gloss one, and neither comes back.

Heat

Use a trivet. Quartz is heat-resistant to roughly 300°F, but a pan straight off the flame can still mark it. Sintered stone takes more, but the habit is the same.

Water

Wipe standing water from joints and around the sink. The board behind any finish is the part that minds, and the edge is where it gets in.

Sunlight

Strong direct sun will move most colours over years. It is worth knowing before you put a dark lacquer on a south-facing run.

If something goes wrong

Tell us early. A lifted edge or a swollen corner caught in the first week is a repair; caught in the first year it is usually a replacement.
